

Functions

Special class

→ Functions :-

a block of code / sub-program → function

that is linked to

a well-designed task

why

Reusability
Readability

Issues

↳ lengthy / Bulky

↳ Buggy

↳ Readability

Recall

Logic

Art of op

genre

Simple function

print 10 times

"Sunder Ko Sunder پسند hai"

(1)

```
void printLine (  
{  
    for (i=0; i<10; i++)  
    {  
        cout << "Sunder Ko _____",  
    }  
}
```

```
int main()
```

```
{
```

```
    printLine();
```

```
    return 0;
```

```
}
```

function call

```
void printLine()
```

```
{
```

```
    for (i=0; i<10; i++)
```

```
{
```

```
        cout << "_____";
```

```
}
```

```
}
```

→ add 2 numbers

fu

Function

declare

```
void printMessage();
```

```
int addNumbers (int a, int b);
```

define

```
int
```

```
addNumbers
```

```
(int a, int b)
```

```
{
```

```
int sum = a + b;
```

```
return sum
```

```
}
```

```
printMessage();
```

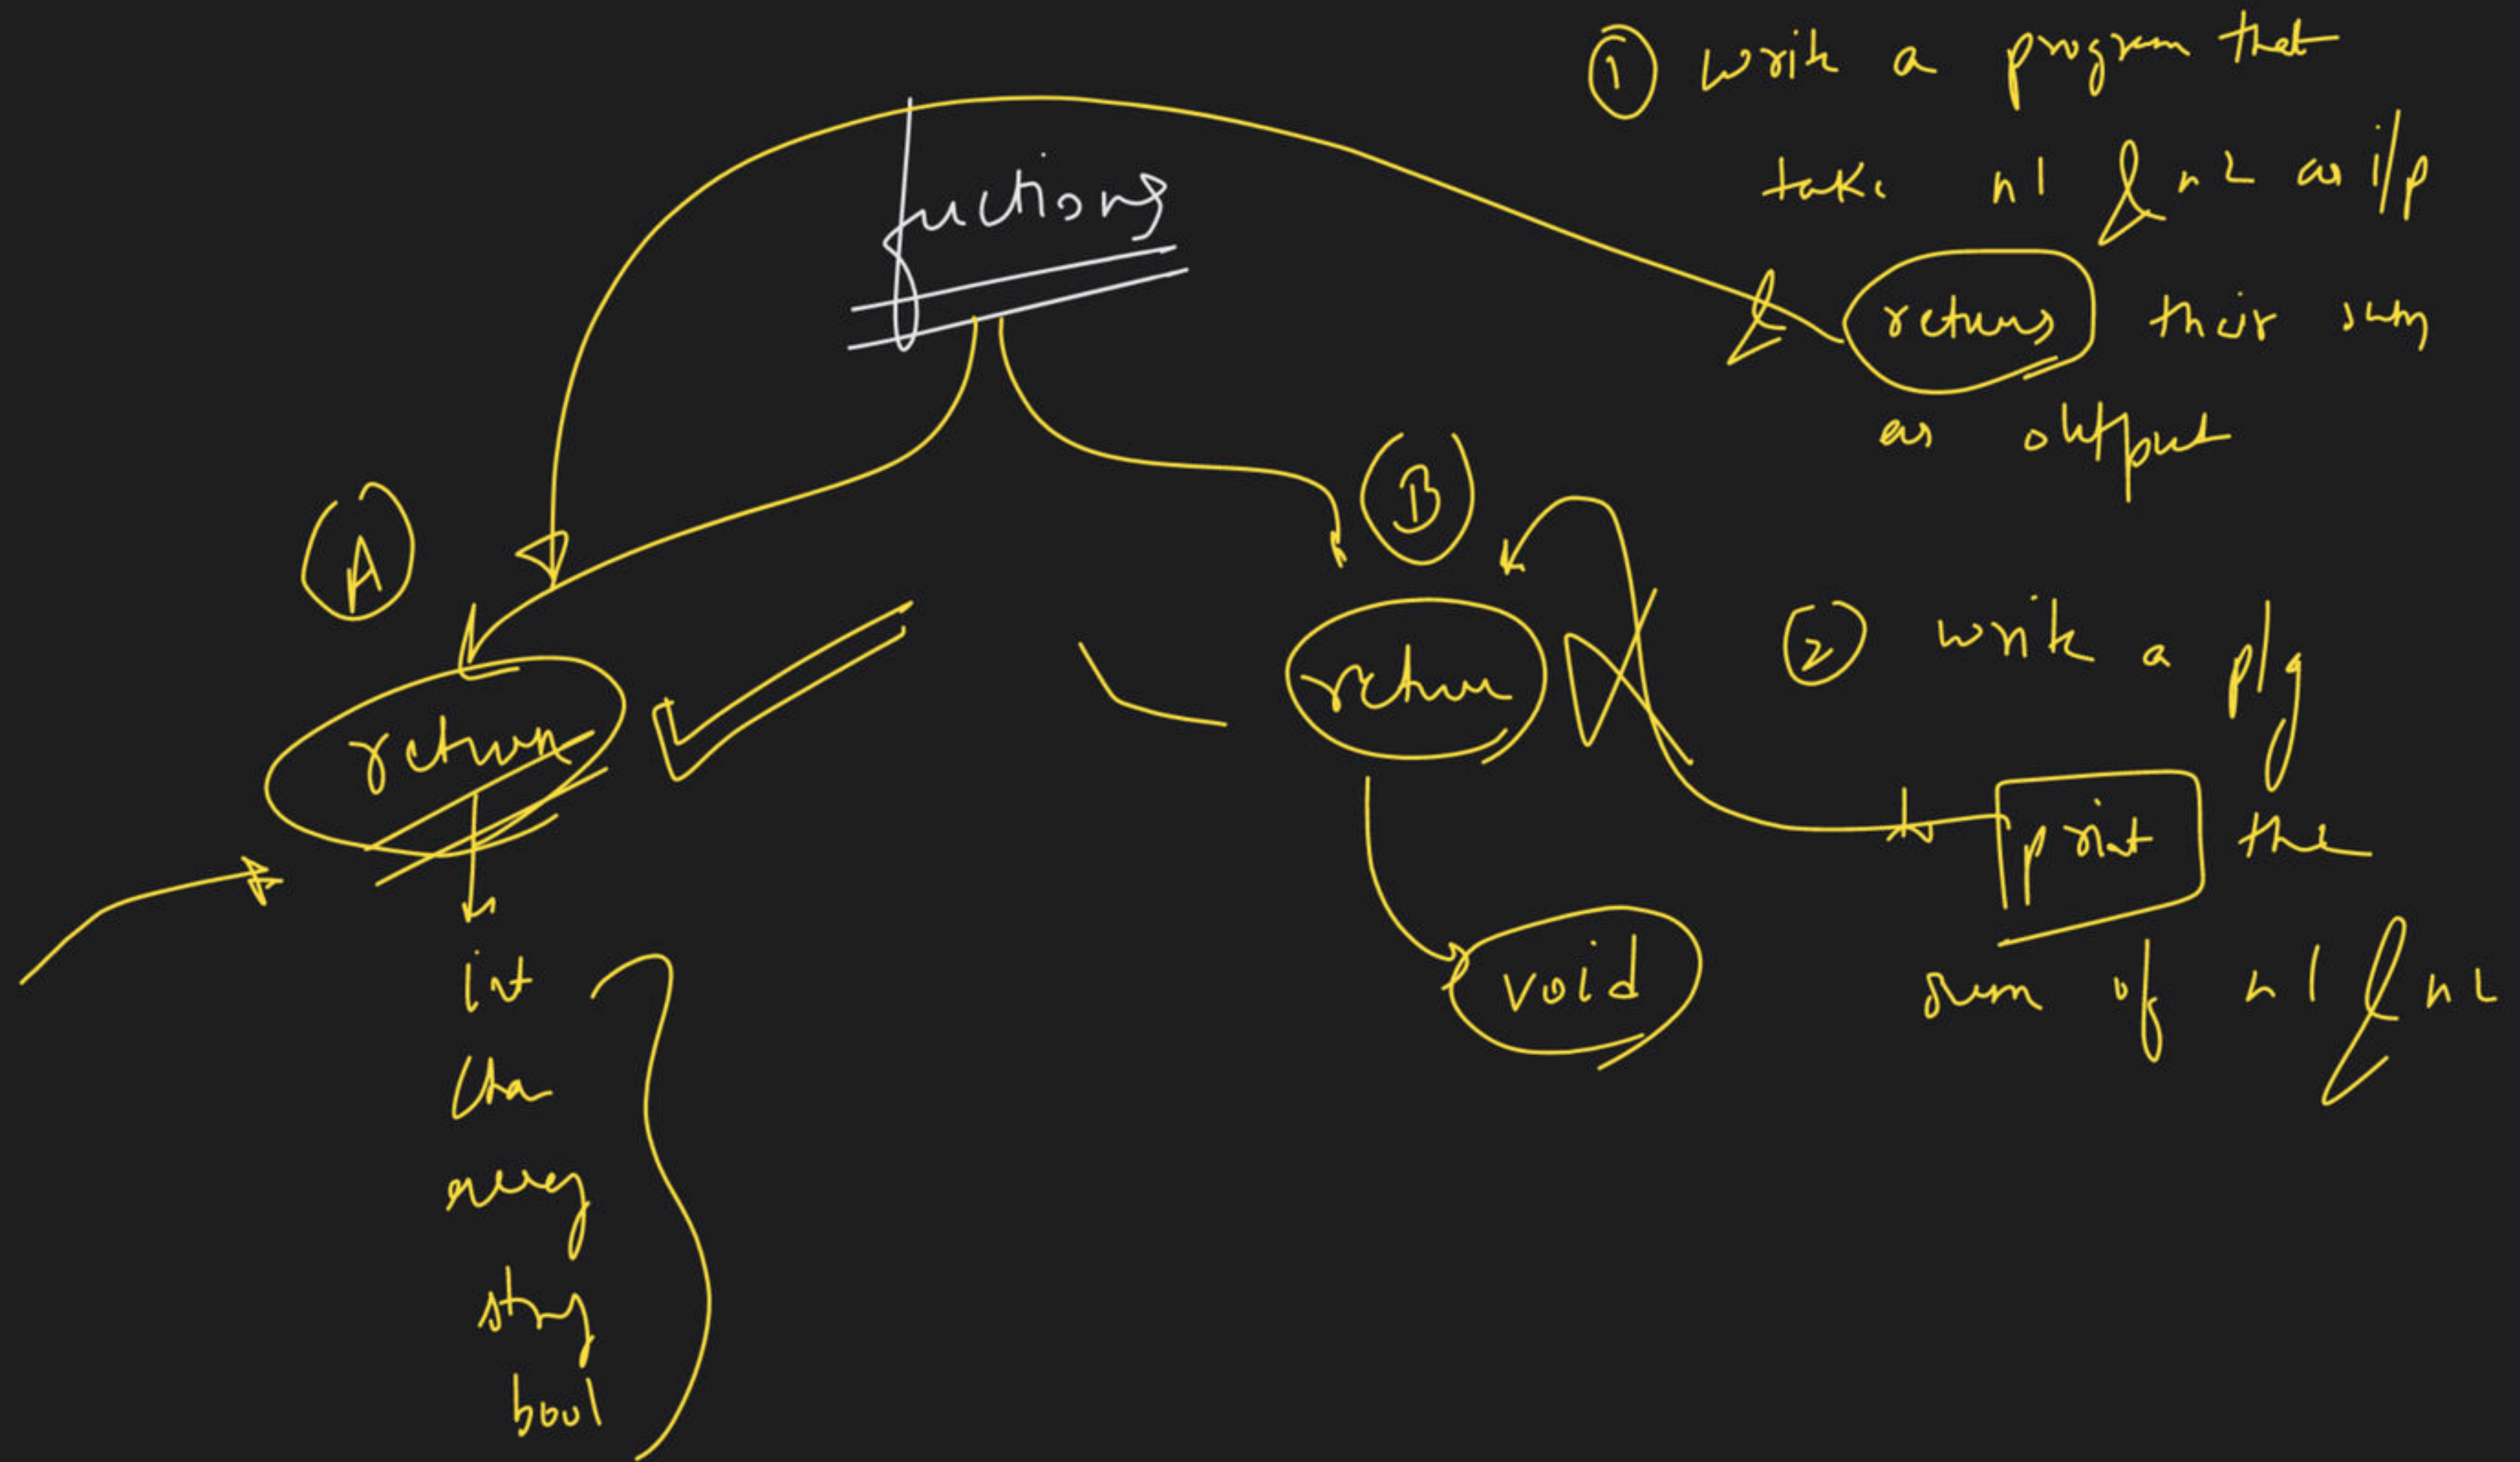

```
addNumbers(5, 3);
```

Function call

function Name

Entry Point

int
{

main()

cout << "Hi";

printA();

printA()

{

cout << "I am inside A"

I_min

}

function khatam ho gye

wapas jao

Output → Hi

I am inside A

Function Call Stack:-

function call

local variable

Kr. func → Kr. func
Kc call Kic

return value

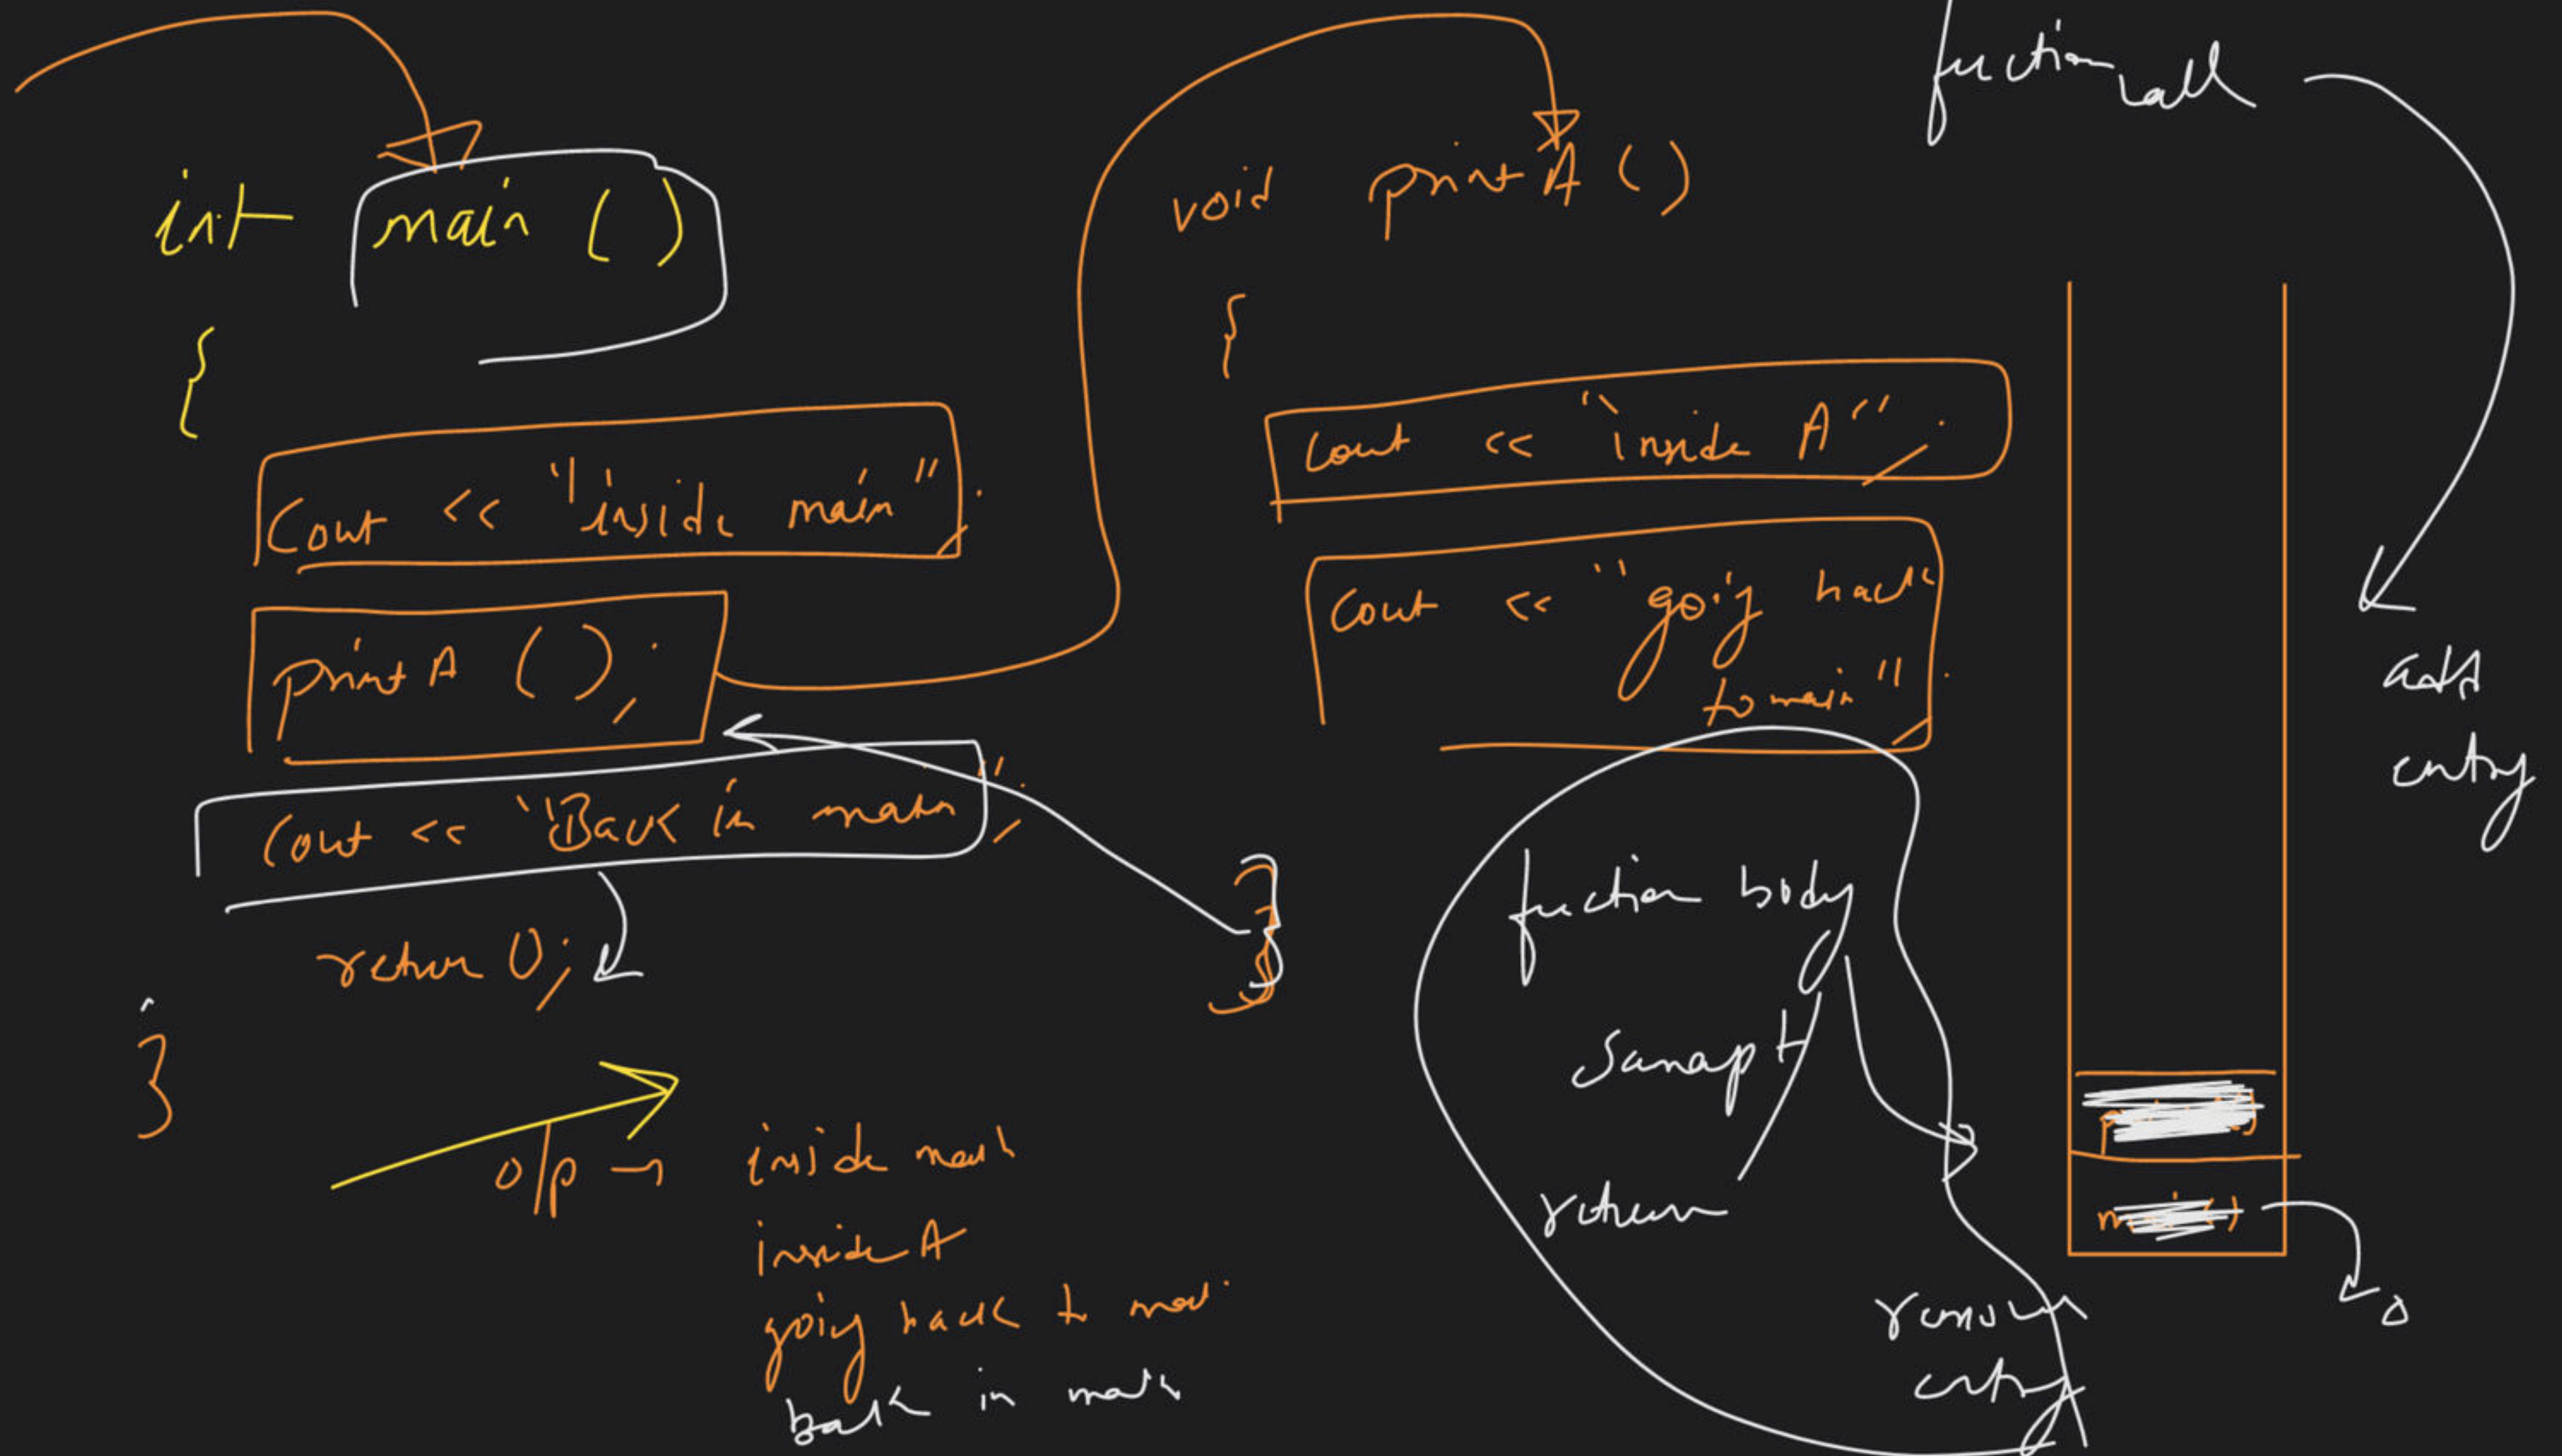

Stack → ?

Last-in
first-out

LIFO

Discord → ?

Q 1 → write a function to print sum of 3 no.

i/p → 3 no

o/p → print sum

void

→ write a function to return sum of 3 no

int

```
int  
{  
  
}  
}
```

```
add (int a, int b, int c)
```

4 + 4 + 5

```
int sum = a + b + c;
```

```
return sum;
```

13

13

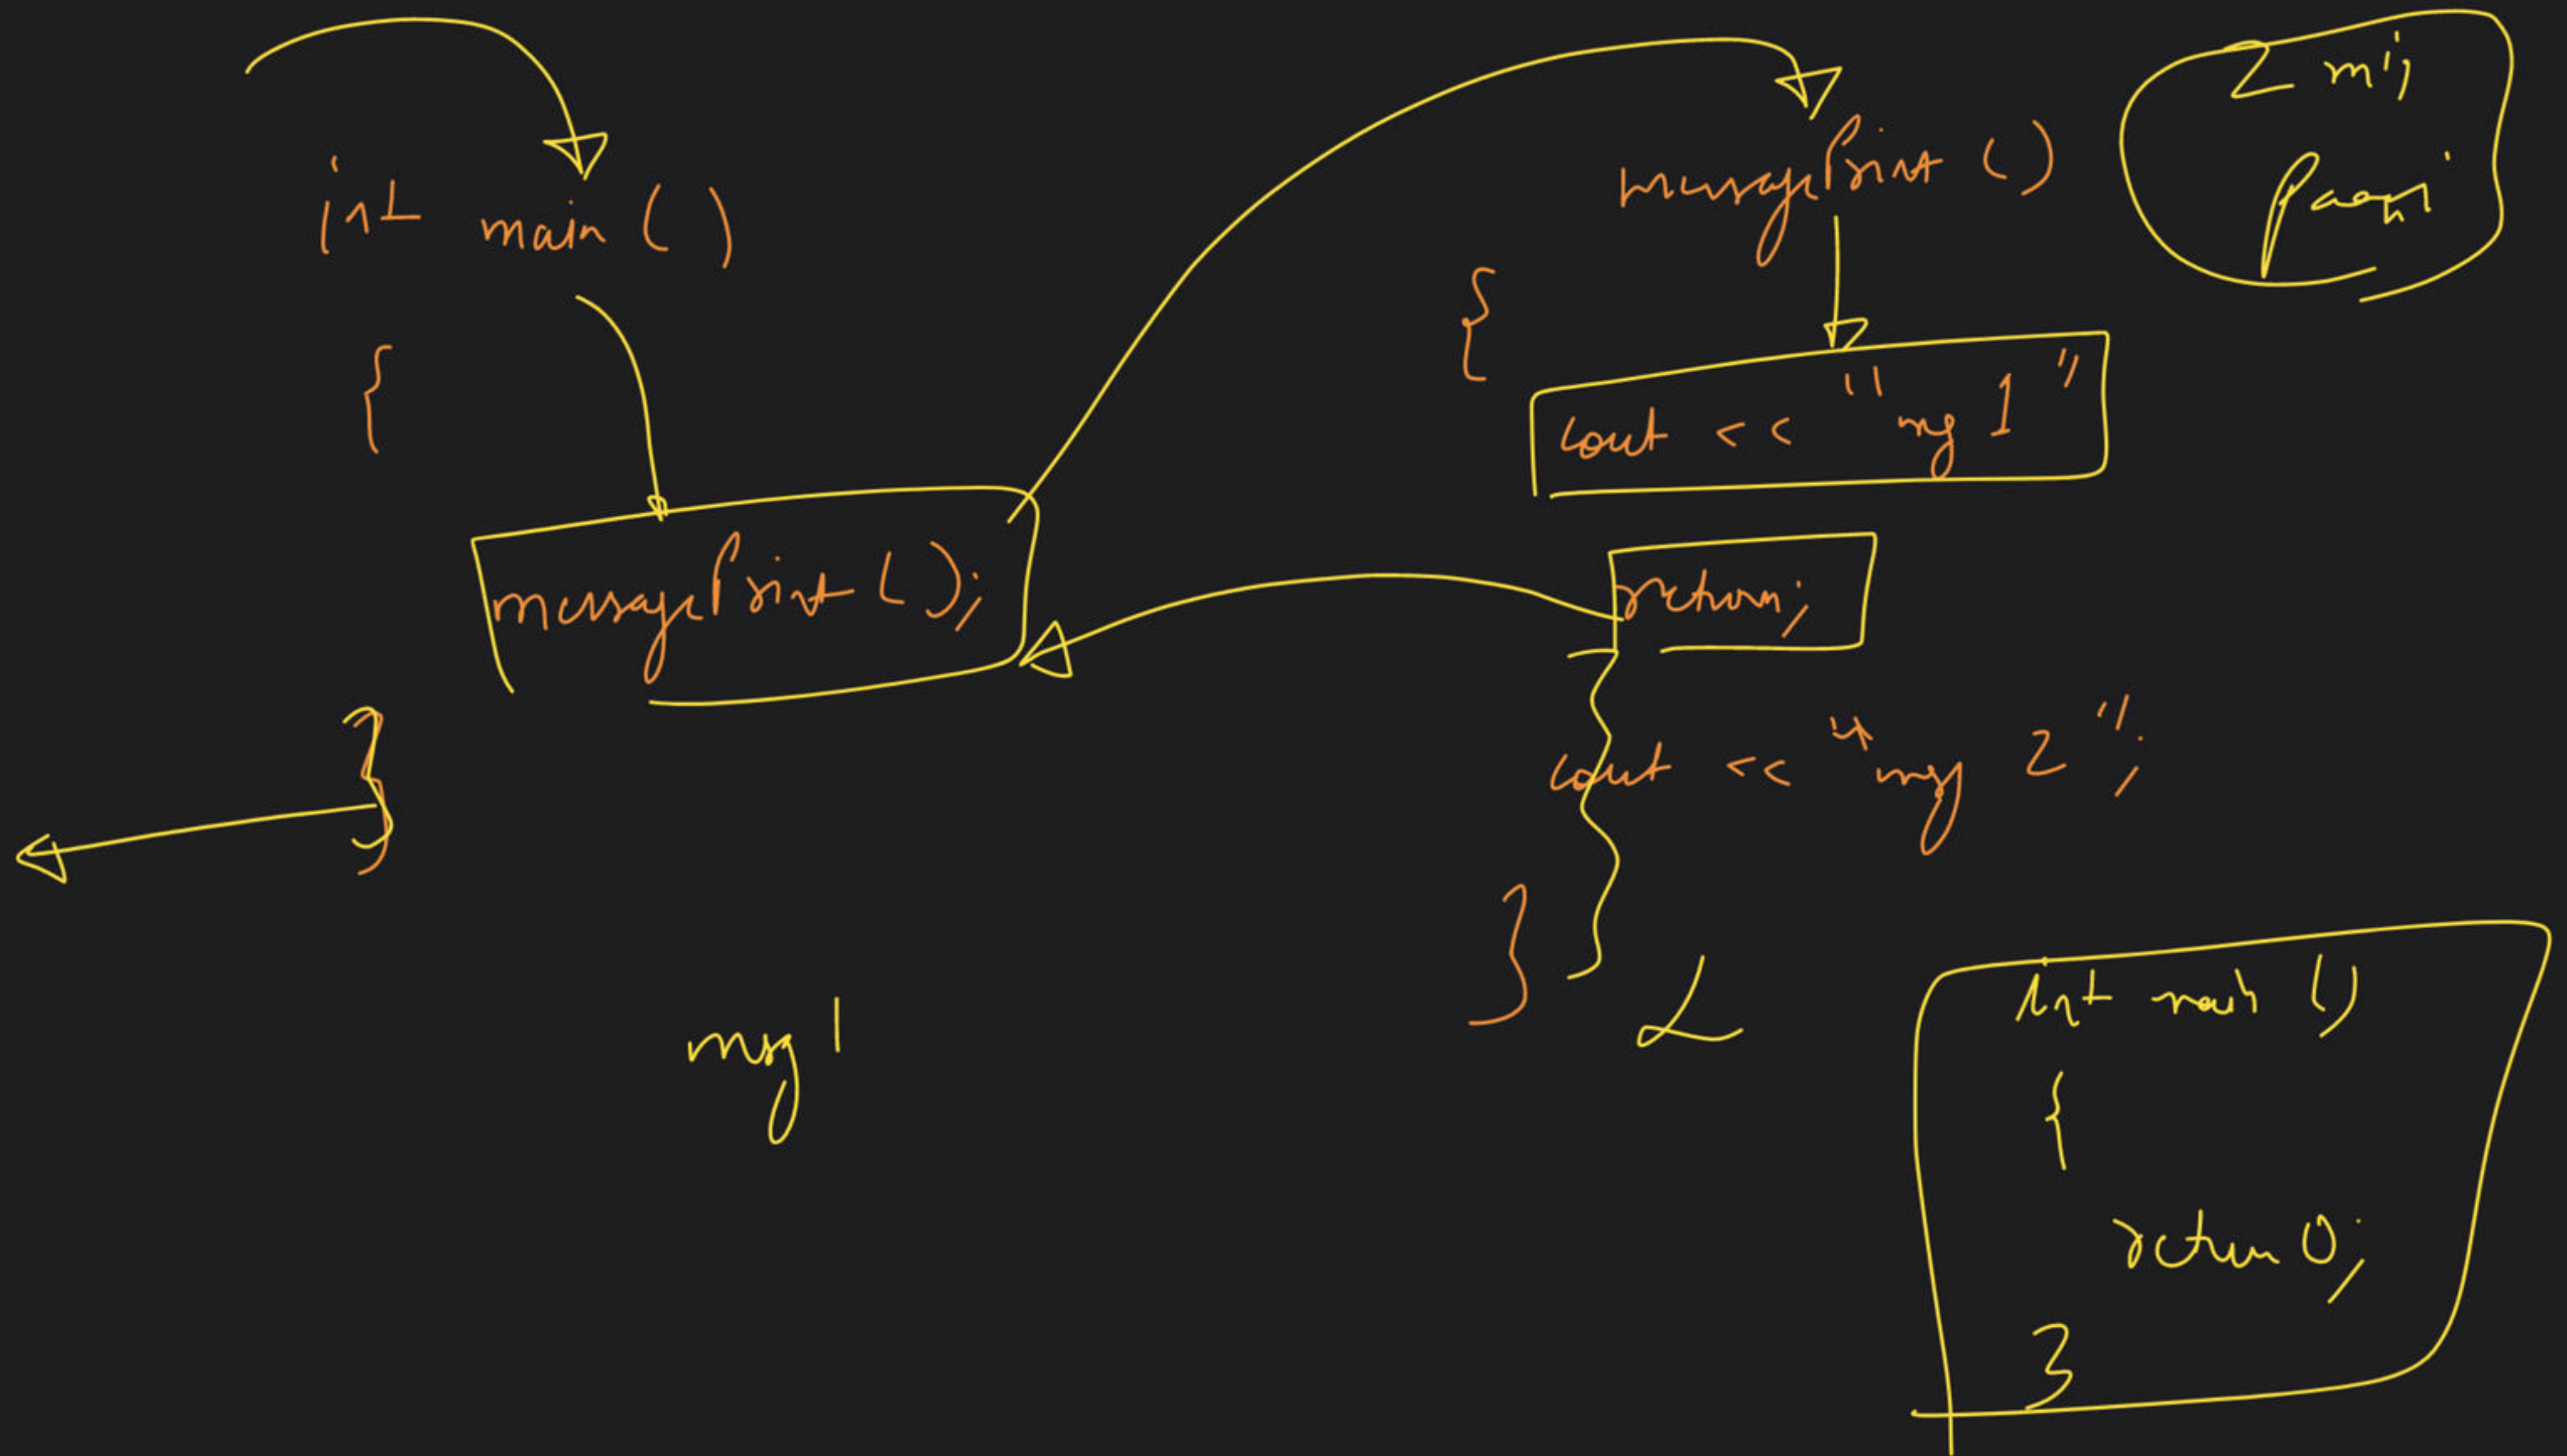

```
int main()
```

```
{
```

```
int sum =
```

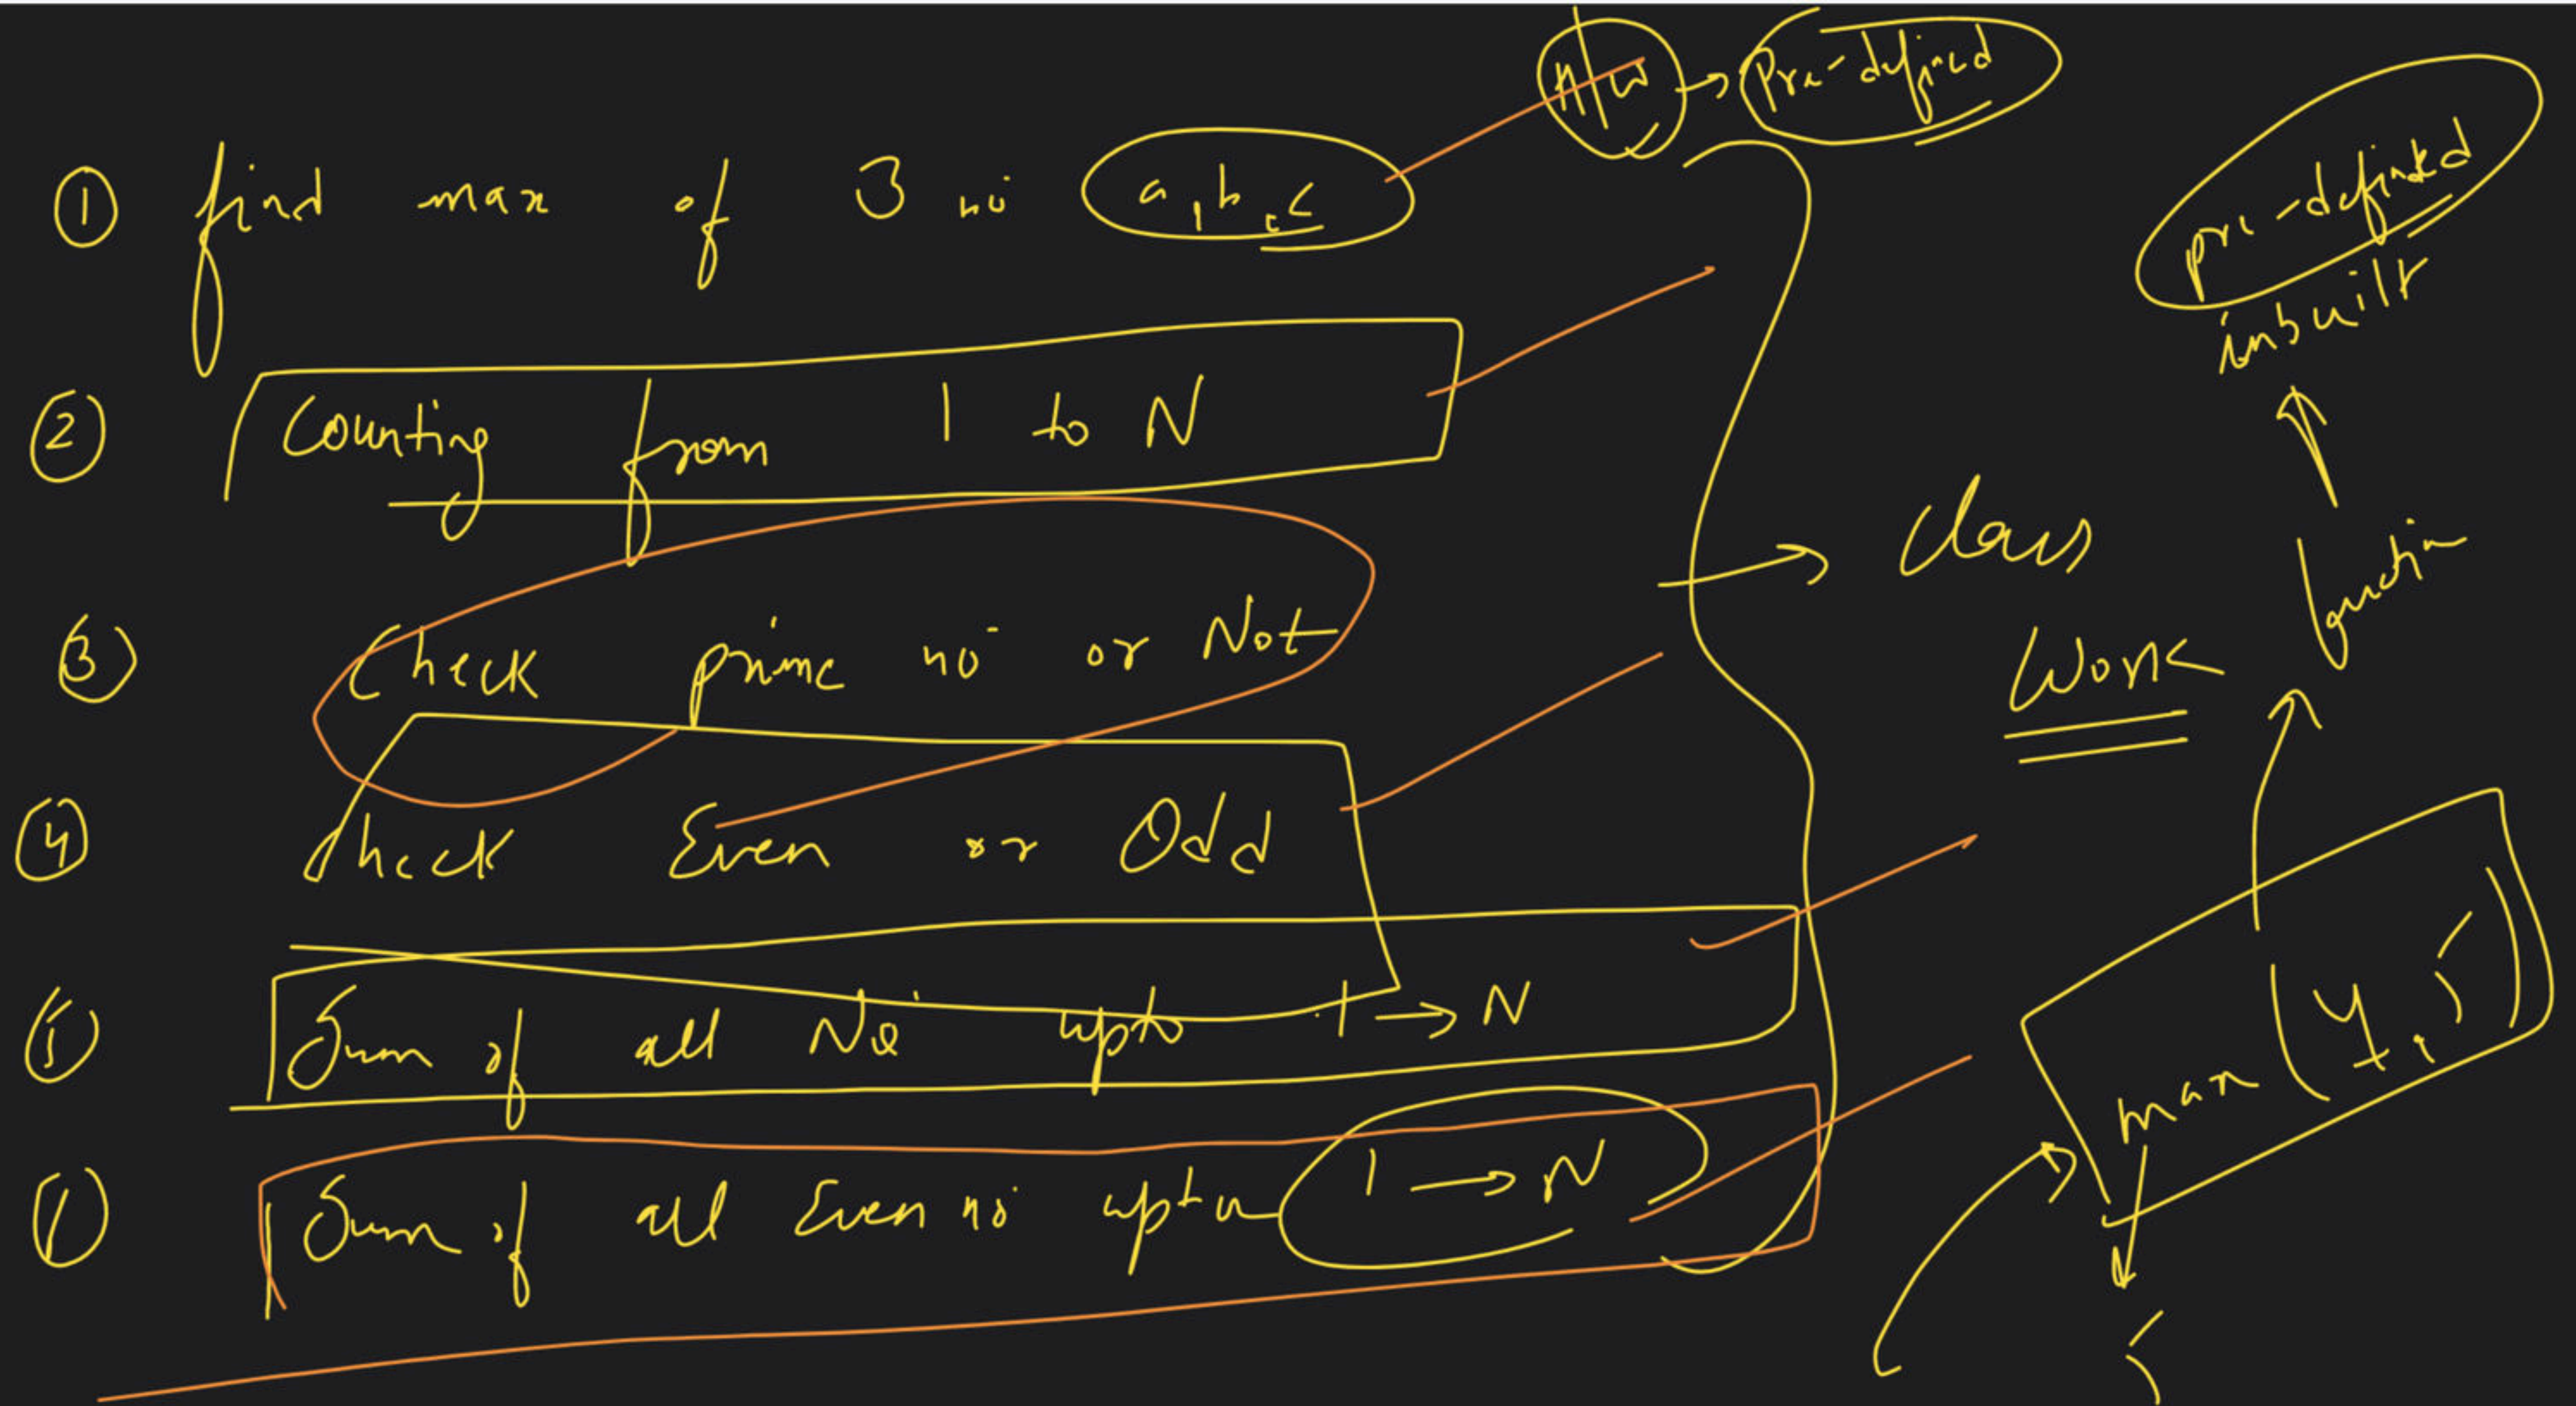

```
sum(4, 4, 5)
```

13

→ find man of 340'

a, b, c

for /
{
}

$$\text{Sum} = 0$$

1, 2, 3, ..., N

0 + 1 + 2 + 3

+ N

0 + 1 + 2 + 3 + ... + N

void findSum (int n)

{
 int sum = 0;

 for (i = 1 → ≤ 10; ⁺² i++)
 {

 sum = sum + i

 }

 cout << sum;

}

55
0+1+2+3+4+5+6+7+8+9+10

sum

= 55

sum = sum - 1

sum -= 1

~~i = 1~~
~~i = 2~~
~~i = 3~~
~~i = 4~~
~~i = 5~~
~~i = 6~~
~~i = 7~~
~~i = 8~~
~~i = 9~~
~~i = 10~~

55

sum = sum + i

or

sum += i

Man

$\rightarrow a, b, c$

man(n1, n2)

Home Work

→ Function to find area of circle

→ Function to find factorial of a No.

→ print all prime no from 1 → N

→ print all digits of an Integer

→ create a no using digits

→ print Binary rep of a decimal no

→ Convert Km into miles

→ convert Fahrenheit into Celsius

→ Count all set bits of a number

→ check even/odd using bitwise operator

Ultra imp
